Work Experience

Frontend Developer — Webline (webline.dev)

Sep 2023 – Aug 2024

- Worked on dedicated projects involving frontend development in close collaboration with the backend team.
- Participated in multidisciplinary teams including design, project management, and scrum teams to achieve project goals.
- Experience working in a structured team environment using modern project management approaches (Agile, Scrum).

Freelance Frontend Developer

Sep 2021 – Present

- Developed modern, responsive user interfaces with React, Next.js, and TypeScript.
- Designed and implemented admin panels and dedicated projects with a focus on user experience and performance.
- Collaborated closely with backend teams to integrate APIs and develop new features.
- Participated in multidisciplinary teams and worked in Agile and Scrum environments.
- Optimized and maintained projects following Clean Code principles and best practices.

Projects

- **Menu-Saz** — menu-saz.ir

Apr 2026 – Present

Contributed to the development of a SaaS platform for building and managing digital menus for restaurants and cafés, as part of a two-person team. Responsible for UI design and development, connecting the frontend to the API and database, and implementing menu management features and settings customization. Also collaborated on deployment, production environment configuration, and performance/UX optimization.

- **SilverBox** — silverboxjs.ir

May 2023 – Jul 2023

A lightweight, multipurpose JavaScript library for creating custom modals and notifications for web applications. Built with vanilla JavaScript with no dependencies, alongside a small team of developers and designers.

- **Front Chapter (2024 Conference)** — frontchapter.ir
Feb 2025

Designed and developed the landing page for the Front Chapter conference held in Shiraz. Had the honor of working alongside the Front Chapter technical team as a frontend developer on this project.

- **Tonrow Company** — tonrow.ir
Sep 2023 – May 2024

A comprehensive, large-scale web application providing online delivery services in Bushehr, Iran. The application includes purchase request management, package transfer, order tracking, and user interaction, fully covering the diverse needs of its users.

- **Gym Coach Website** — heydarifatemeh.ir
May 2024

Website for fitness coach Fatemeh Heydari, showcasing her fitness and wellness services along with complete information about her offerings.

- **Niroo Saei Derakhsh Company** — niroosaiedarakhsh.ir
Dec 2024

Designed and developed a professional website showcasing the services of Niroo Saei Derakhsh Company, including company introduction, engineering and contracting services, a portfolio, and customer contact. The site features a modern, user-friendly design reflecting the company's identity and activities.

- **Remiona Sales Invoice Tool** — factor.remiona.ir
Jan 2025

A professional tool for issuing store sales invoices, custom-built for Remiona store. Helps the store issue invoices faster, more accurately, and in a more standardized way, while storing customer purchase information in an organized manner. (Desktop use only.)

- **ECRP Email Format Tool** — Lssd-email-format-tool.vercel.app
Apr 2025

An automatic email format generation tool for the LSSD faction on the Eclipse Roleplay server, built to simplify the creation of official automated in-game emails. Uses dynamic structures for each section (RED, TSD, ATD).

- **ECRP Legal Faction Playtime Tracker Tool** — Australian employer, private
Apr 2025)

A tool built for the management team of the Eclipse Roleplay game server. Tracks each faction leader's play time across their various characters and provides statistics so the management team can monitor activity. (Private tool; can be demonstrated with the employer's prior permission if needed.)
